GUIDE TO CARE FOR LIDS AND EYE AFTER LID SURGERY

1. Remove the pad as advised after washing hands.
2. Wash the lid with mild soap and water. **Do not let the stitches get crusty.**
3. If you had surgery to the lower lid, avoid pulling at it when instilling the drops and ointment.
4. Drops can be applied into the inner corner of the eye without pulling the lid.
5. Please make sure that the **antibiotic ointment** is applied to the lid where the wound/stitches are.
